

Update
July 2024

RECRUITER PORTAL

Module	Functionality	Description
Position	Position duplication: video field information recovery.	When duplicating a position the information in the video field is now duplicated.
Position	Improved client selection for a position.	When selecting a client for a position, the elements that begin with the text searched are displayed first and then those that contain the text searched. The display of 20 results is kept.

Module	Functionality	Description
Position	Modification of position deletion rules.	Modification of the rules allowing the deletion of a position by a user. A user can delete a position: - If no application is attached to the position - If no candidate action follow-up is attached to the position - If no candidate has been hired - If the position is not posted - Even if the position is linked to the MP or Client page - Even if it has a business follow-up - Even if a position description has been entered - Even if it has questions related to the position - Even if it has been multiposted - Even if it has several position references - Even if it has searches related to the position - Even if it has search results associated with this position.

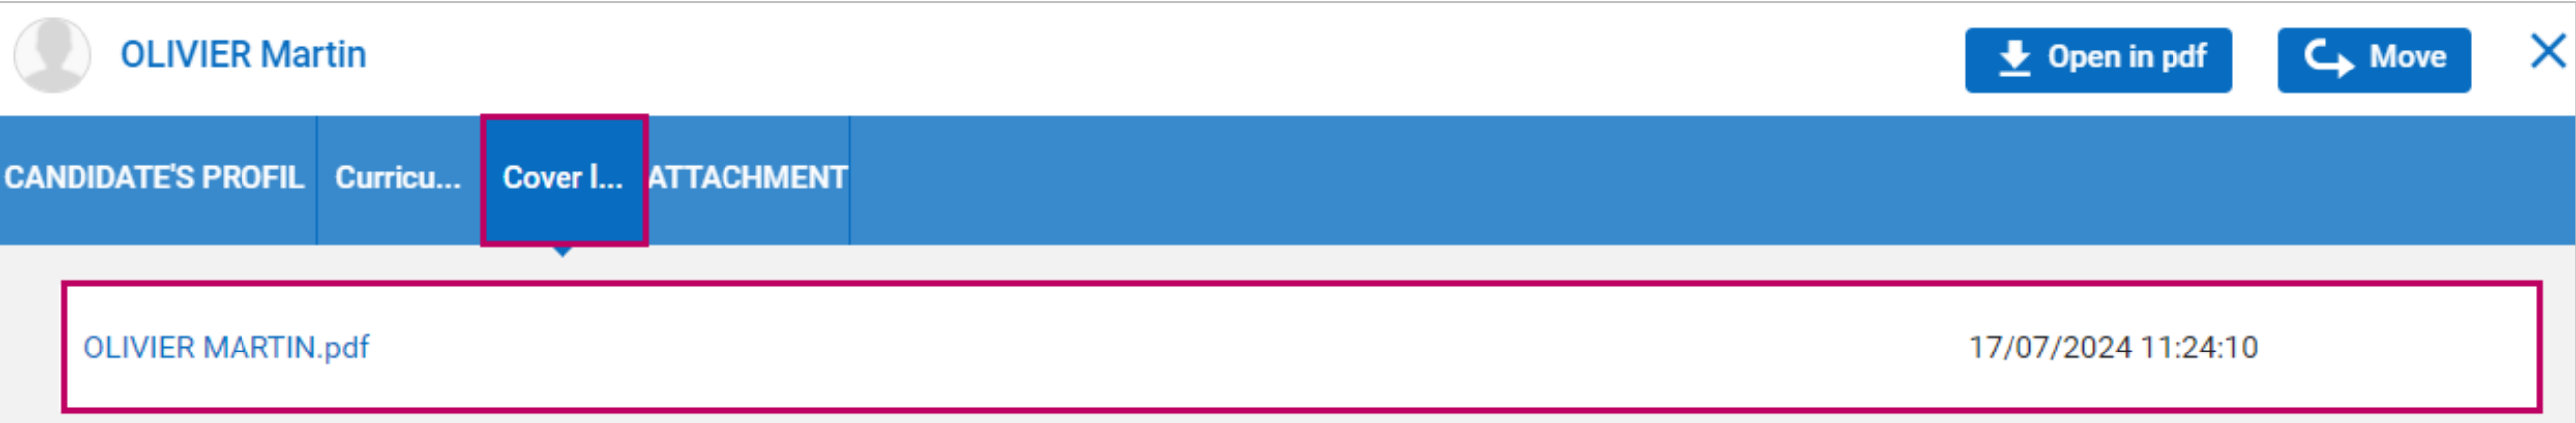

Module	Functionality	Description
Candidate	Changed parsing rules.	See online help for details.
Mass Mailing	Signature is taken into account when sending mass mailing campaigns.	When sending an email with the mass mailing functionality, the user signature is taken into account.
Indeed Apply	Parsing of CVs coming from Indeed Apply.	The CVs of the applications integrated via Indeed Apply will be parsed.
General	Display of the ID in the client grid available. Contact, Position and Candidate.	It is now possible to customise the Client, Contact, Position and Candidate grid with the ID column.
Settings	Management of attachment types from application settings.	Improved settings to allow adding, editing and deleting candidate attachment types.

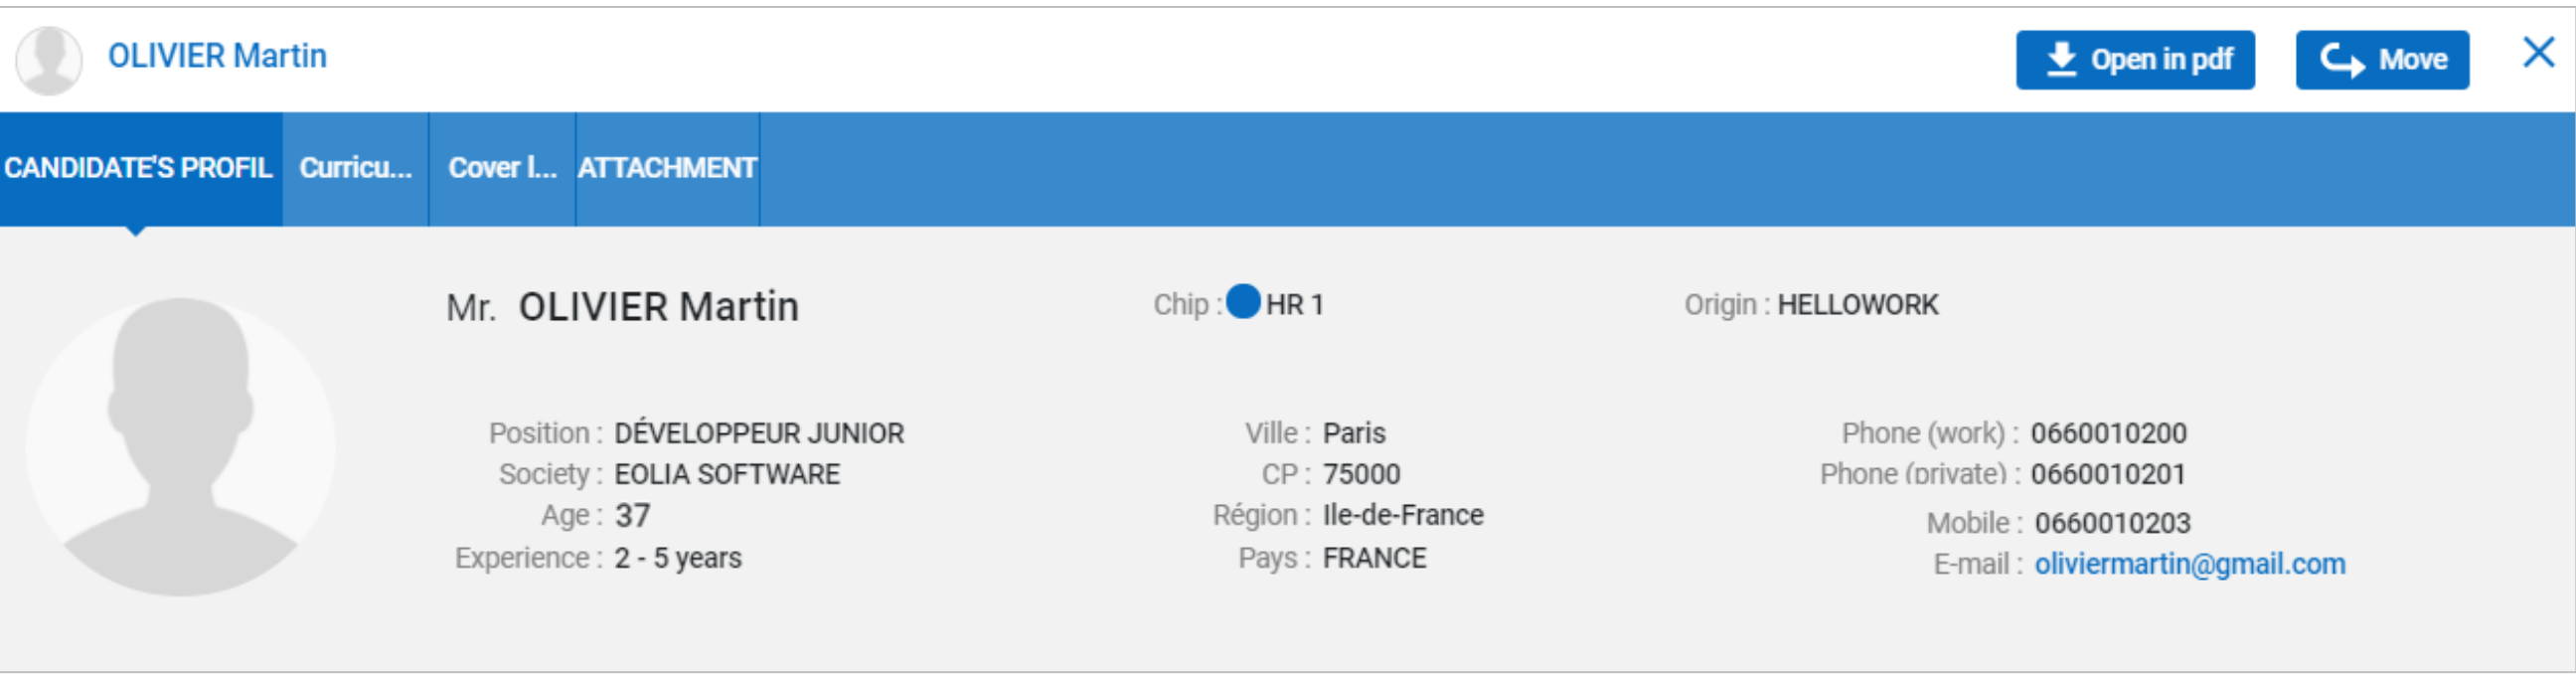

MANAGER PORTAL

Module	Functionality	Description
Candidate	Modification of status « New » to « Not viewed ».	The « New » tag has been modified to make its purpose clearer. It will automatically disappear when the user opens the candidate's file. Current vacancies Positions Reference Candidates Not consulted Posted job ad IT MANAGER EOLIA - IT - Employee - Recruitment eolia-1733 1 1 - +
Candidate	Display of the time and date of the appointment associated with a step of the recruitment process shared on the Manager Portal.	When a step of the recruitment process visible on the Manager Portal is associated with an event in the calendar, in addition to the comment, the type, date/time and the event manager are displayed. Progress report ANKRI Philippe 16 July 2024 Telephone interview The candidate has good experience. RDV : 17/07/2024 - 12:30 - Philippe ANKRI

Module	Functionality	Description
Candidate	The type of Att. in the candidate's Atts. is displayed. Grouping of attachments by type.	When the attachment is typed, the type is displayed in the candidate's file. Attachments are grouped by type and when you click on a type, you have the list of matching attachments.

Candidate	Additional information available in the candidate's file.	Possible display of the following information: Civility, Post code, City, Region, Country, Tag (title + colour) and origin of the first application on the candidate's file.
-----------	---	--

Module	Functionality	Description
Candidate	The candidate's actual attachment instead of the preview is displayed.	When the attachment link is clicked on, the candidate's actual attachment is displayed.
Position	In the list of positions, additional information under the position title is displayed.	Possibility to display the fields with the following technical titles: Status, Business Line, Category and Division of attachment. These fields may have been renamed in your base.

Module

Functionality

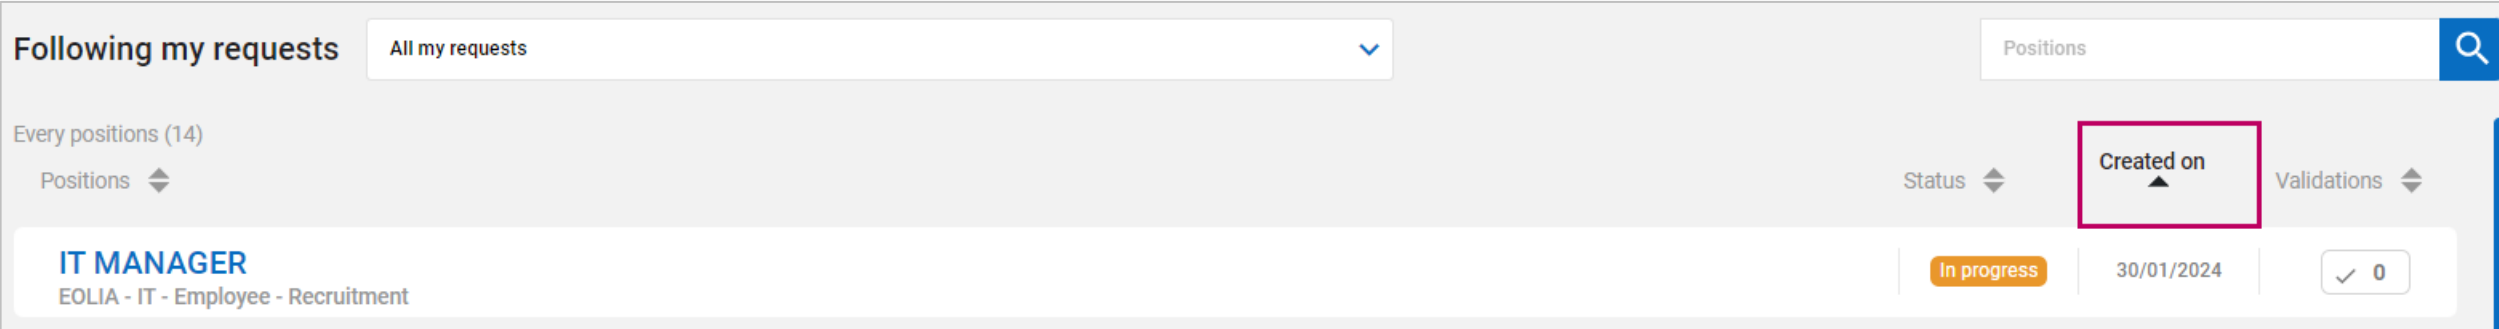

Description

Recruitment
request

Modification of texts so that the follow-up of
recruitment requests is clearer.

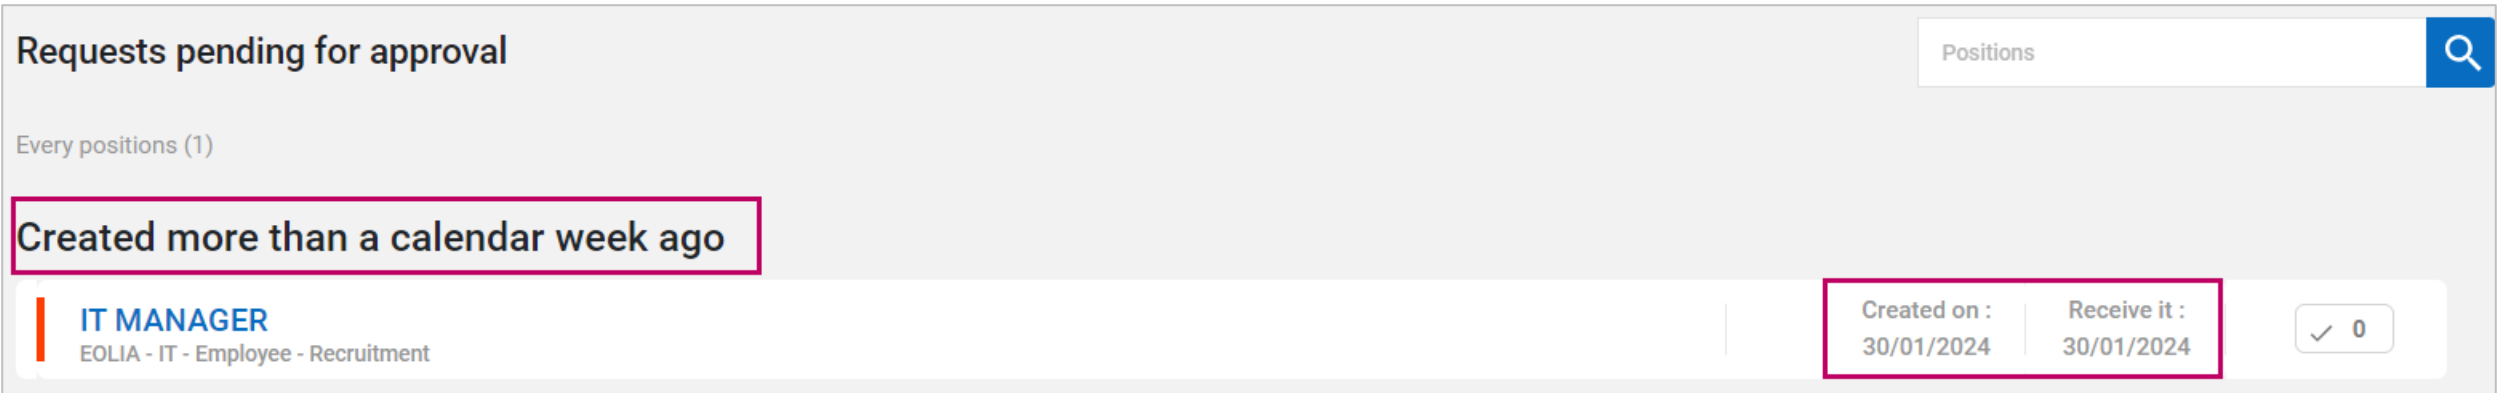

Follow-up of my requests

- The text « Since » has been replaced by « Created on ».

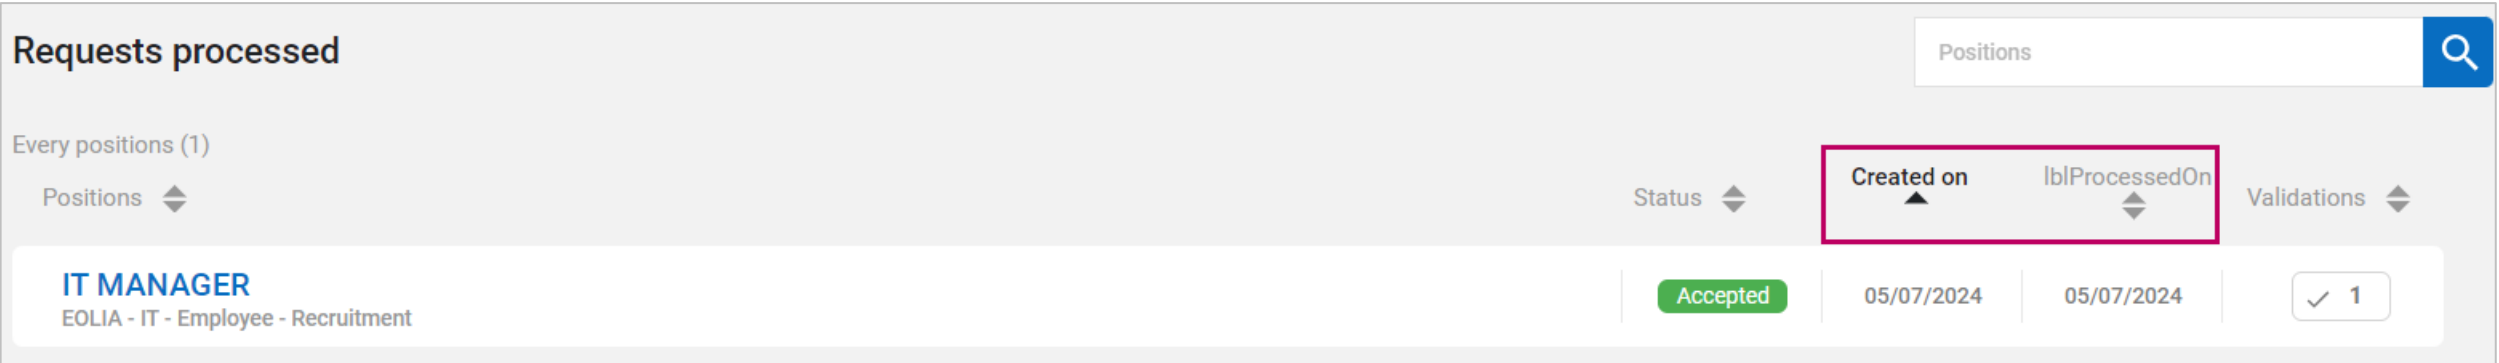

Requests to be validated

- The text « Since » has been replaced by « Created ».
- Modification of titles to add « Created since ». Example: created since more than one calendar week ago.
- Addition of the « Received on » column with the transmission date after the « Created on ».

Request processed

- The text « Since » is replaced by « Created on ».
- Addition of a « Processed on » column with a processing date after the « Created on » column.

CORRECTIONS

Module	Bugs	Corrections
Manager Portal	Error when connecting to the manager portal from a web link if a connection to the manager portal was still present	The connection from a link contained in an email or a web page will work correctly in all cases.
Manager Portal Candidate	When moving a candidate to another step, it was possible to create several times the same step.	It was possible to click on the “validate” button several times during the validation of a candidate’s step change and to create the action several times. Only one action will be created now.
Recruiter Portal Position	Disabling the action of the «duplicate» button when pressing the "Enter" key on the keyboard.	In a position file, when pressing the “Enter” key on the keyboard, it will no longer start the duplication of the position.
Recruiter Portal Client	It is possible to create a client without a title.	The title field of the client file is now mandatory and not configurable.
