

Eolia Update
3.16 Version

1. Presentation
2. New features
3. Improvements
4. Corrections

The purpose of this version is to:

- Improve the graphic aspect of some pages of the application (especially the main grids).
- Include certain UX modification: removal of the tag, removal of the right click to perform actions.

Module	Features	Description
General	Interface with Hellowork	<u>Hellowork job offers Flow:</u>
	This interface will enable the client to obtain the label “Super Recruiter” on HelloWork	Technical improvement of the job offers flow transmitted by Eolia to Hellowork
	The Eolia Project Manager must be contacted by the client to request the deployment of this interface.	<u>Integration of applications in Eolia:</u> The integration of applications sent by Hellowork can now be done via API
		<u>Submission of the application state of progress to Hellowork:</u> It will now be possible to forward the state of progress of an application to Hellowork based on the action follow-up carried out in Eolia on the application. This transparency regarding the recruitment process will enable the client to obtain the label “Super Recruiter” on Hellowork.

Module	Features	Description
General	Integration of a user support tool	The goals of integrating this tool into Eolia are to: • Help new users get started with the solution • Provide guidance to all users • Provide guidance to users during Eolia updates • Facilitate the adoption of Eolia • Save time for the support team
General	Limitation of modules opening to only one tab per module	The user will only have one tab open per module (CLIENT, POSITION, CV DATABASE, REPORT)
Candidate CV database	Implementation of a PDF reader for the candidate's CV	Addition of a PDF viewer for reading candidates' CVs in place of the instant preview of the CV with a mouse hover. It allows the user to view the candidate's "real" CV instead of the text format of the CV. Transformation of documents in another format (word, odt, etc...) into PDF

Module	Features	Description
General	UX/UI Graphic enhancements	Graphic improvement of the following pages: - List of clients - List of contacts - List of positions - List of candidates - Header of the clients forms - Header of the contact forms - Header of the positions forms - Header of the candidates forms
General	Replacement of the right click by a button to access actions from the grid	From the grid, the right-click feature allowing access to a list of actions has been removed. This feature is replaced by a dedicated button
General	The Eolia logo returns to the home page	To return to the homepage, the user can click on the Eolia logo
General	Improvement of filters	Grouping of Actions, Searches, and Filters

Module	Features	Description
Client	Change of format of the Client/Contact import template	When downloading the Client/Contact import template available to users, the format of the template will be in csv format and no longer in Excel format
Candidate	Action “transfer attachments to contacts”: Improved display area for attachment selections	Action “transfer attachments to contacts”: Improved display area for attachment selections

Module	Anomalies	Corrections
Contact	Anomaly in the search contact by phone via the widget	Correction of the anomaly
Rights	Users without rights could access the widget	Correction of the anomaly
Indeed Apply	Non-integration of applications with one or more special characters in the attachment	Correction of the anomaly
Mail sending	Loss of information in the recipients, cc and cci area when choosing a letter template	Correction of the anomaly
