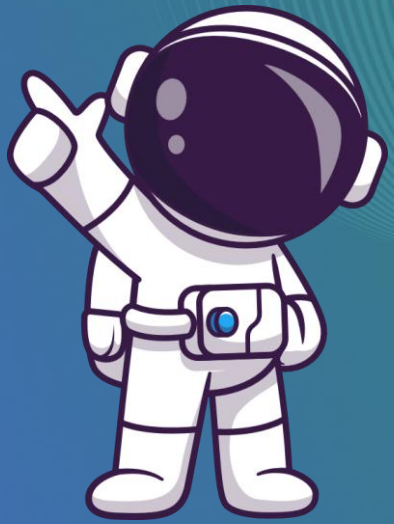
Eolia Update
Version 3.18

SYNOPSIS

1. Presentation
2. New features
3. Improvements
4. Corrections

The goal of this version is to facilitate data exchange with other systems by enhancing the Client and Contact APIs.



Module	Features	Description
Client	Client APIs	Implementation of new Client API routes enabling: • Management of additional fields • Management of Client groups • Access to client reference lists: Badge, Country, Manager, Business Unit, Industry sector
Contact	Contact APIs	Implementation of new Contact API routes to better manage Contact information: • Management of a contact's roles • Access to contact reference lists: Badge, Function code
Job	Multi-posting with TalentPlug	Configuration of multiple application receipt email addresses for multi-posting with TalentPlug

Module	Features	Description
Candidate	Candidate deletion	Implementation of enhanced control over permanent candidate deletion: • Deletion from the candidate grid will no longer be available • The action is accessible from the candidate profile or grid via the "Action" button • Access to this feature is restricted to specifically authorized users Activation of this feature will be gradual after the update to ensure secure rights management
Candidate	Retention of candidate information when navigating between tabs	In the candidate profile, unsaved information will no longer be lost when switching tabs.
Candidate	Quick and simplified access to the CV	The user can view the CV by clicking on the icon in the candidate profile header.
Job	Changes to job visibility rules	For positions with two managers, visibility is determined solely by the agency of Manager 1.
Client	Navigation from one client profile to another	The tab open in the client profile remains selected when switching to another client.

Module	Features	Description
Candidate	Graphical and ergonomic update of the “Action Tracking”	Implementation of filters on the following elements: • Action type header • Action type • Job • Manager Retention of existing features: • Keep the current filter for system steps • Preserve the existing search functionality Visual enhancement: • Replace the table display with a card-based layout • Remove the '+' button from the old list header The addition of an action follow-up will be done via the action button located in the candidate’s header.

4. Corrections

Module	Bug	Corrections
General		Resolved the issue that displayed the page in English and triggered automatic translation in Chrome.
Job	Recruitment request	Resolved the issue that allowed a recruitment request to be published without HR approval.
